Shiban Hafiz

Second-year B.E. AIML student · AITM, Bhatkal · Expected graduation 2029 · Bhatkal, Karnataka, India · GitHub · LinkedIn

Profile

I build practical software, full-stack applications and applied AI while strengthening engineering fundamentals and learning through projects.

Skills

Programming: Python, C, JavaScript · **Frontend:** HTML, CSS, React, Vite · **Backend & APIs:** FastAPI, Express.js, REST API fundamentals · **AI / ML:** AI API integration, machine-learning and computer-vision fundamentals · **Database:** SQL fundamentals · **Tools:** Git, GitHub, VS Code, Docker fundamentals, AI-assisted development tools

Projects

Harvex — AI-Assisted Smart Farming: Field information, irrigation decision support, crop and leaf analysis, weather, multilingual agronomy and voice assistance. *React · Vite · Express.js · FastAPI · Python · APIs · AI services*

CyberShield — Community Cybersecurity: VTU 1BCP308 team project covering explainable message analysis, static URL checks, privacy-oriented reports, learning and admin review. Scores are indicative; URL checks never visit links. Repository

AgentBreak — Security Testing Prototype: URL submission, automated security-oriented checks and structured reports; findings are not guaranteed vulnerabilities. *React · TypeScript · APIs*
